

Definition

Face-to-Face is characterized when instruction occurs in a traditional classroom with face-to-face interaction between the instructor and students, at any local campus or remote site, and includes utilization of technology to enhance the class without reducing student seat-time.

Blended/Hybrid learning is designed specifically to be delivered partially online and partially through face-to-face (F2F) interaction, typically in the classroom. Both online and F2F interactions are required for the course to be considered blended/hybrid. This delivery is characterized by the expectation of reduced F2F class meeting time when compared to the equivalent credit seat time.

Remote implies that this course section is offered completely outside of the physical classroom but students are required to meet at a scheduled time, potentially through online resources.

Online delivery implies the course section is offered completely online and students may participate any time of the day, with no face-to-face, real time interaction between instructors and students.
