CANCELLATION, FEES AND WAIVERS

Registration may be canceled for non-payment of fees. Cancellation does not necessarily eliminate registrant from financial obligation. Students taking only extension or non-credit courses do not need to apply or pay for admission. Extension and non-credit courses may not qualify for federal financial aid or fee waivers. Contact the School of Outreach for more information. Upon request, Montana Western provides reasonable accommodations, including written materials in alternative formats for persons with documented disabilities. For more information, please contact UMW Dean of Students at 406-683-7900.

</table>
Advanced Classroom Management: Children as Change Agents

This course focuses on cognitive and cognitive-behavioral interventions with an emphasis on teaching students how to change and manage their own behavior. Since previous knowledge and understanding of traditional behavioral concepts and strategies is required, it is strongly recommended that you take an introductory behavior management course to learn the basic terms and concepts of behavior management prior to taking this advanced course.

Attention Deficit Hyperactivity Disorder: Information & Intervention for Effective Teaching

This course provides a better understanding of ADHD and intervention strategies to facilitate positive student change. The history of the disorder, accepted methods to assess and identify students with the disorder, and various methods, medications, and strategies that are currently used to treat it will be covered. For situations beyond what can be done in the classroom, the referral process for getting help for the student will be addressed.

Autism & Asperger's Disorder: Information & Interventions for Effective Teaching

Provides information on the characteristics of the disorder, associated learning styles, communication weaknesses and various intervention strategies that have proven to be successful when working with students with Autism spectrum disorders. Make sense of why individuals with Autism spectrum disorders act the way they do and what you can do to enhance more appropriate behavior.
Behavior is Language: Strategies for Managing Disruptive Behavior

This course provides a developmental framework to help the learner understand what students are trying to communicate through the “language” of their behavior. Topics covered include behavioral techniques and intervention strategies that remediate disruptive behaviors, reduce power struggles while increasing classroom control, reduce educator workload, and help preventburnout. After successfully completing this course, the educator and his/her students will be better equipped to find and implement creative, effective solutions to behavioral problems.

Build School Communities: Brain Smart Classroom Management

This course helps teachers build genuine bonds between themselves and their students and between students and their classmates, to create “kindred classhomes” with a foundation of acceptance, respect, and shared purpose. This course will help you develop strategies, rituals, and environmental design skills to create these safe havens of learning. Students will learn how to differentiate for classroom management and discipline similarly to differentiating for students’ diverse academic needs.

Ceramic Science for the Artist

Instructor, Dr. William Carty, has developed a unique approach to help ceramic artists understand ceramic science and how to apply this knowledge to solve studio problems. Participants will work together to invent glaze formulas, mix test glazes, develop ideas, share information, discuss problems and work toward solutions. Upon completion of this course, students will return to their studio with a working knowledge of chemistry and how it applies to glaze and clay development. Visit Archie Bray Foundation at archiebray.org for complete listing, registration steps, and possible scholarship opportunity.

Child Abuse: Working with Abused & Neglected Children

This course covers how to recognize the signs of physical, emotional, and sexual abuse, and physical and emotional neglect in students. Specific factors that exist in families who abuse or neglect their children will be covered. Emphasis is on helping the participant understand the special learning needs of abused or neglected children, how to meet those needs in the regular classroom, and working with parents and community agencies.

China Painting: New Directions

China paint, also known as overglaze enamel, has been a popular ceramic decorating medium for a thousand years. Instructor, Paul Lewing will demonstrate painting with various brush types, stamping, printing, spraying and stenciling. Students will investigate resist and wipeout techniques, traditional shading and ground-laying methods and a variety of fascinating materials unfamiliar to most ceramic artists. This workshop is recommended to individuals with some experience in ceramics, traditional china painting or a non-ceramic painting technique. Visit Archie Bray Foundation at archiebray.org for complete listing, registration steps, and possible scholarship opportunity.

Drawing for Educators

Upon completing this course, teachers will be able to exhibit and demonstrate a knowledge of a variety of drawing styles including gesture, scribble, upside-down, contour, negative space and shape-recognition concepts and disciplines. Teachers will learn techniques used to create drawings using line, value, texture, color, design, and materials. Teachers will be encouraged to share ideas and experiences of what is useful and needed in the classroom setting.

Drugs and Alcohol in Schools: Understanding Substance Use & Abuse

This course provides a contextual framework for understanding what students may be experiencing either through their own substance use or as a result of the substance use of persons close to them and provides a basic historical perspective of substance use along with the biological, psychological, and social factors that comprise the disease of addiction. Upon course completion, the learner will better understand the complex dynamics that contribute to this biological and social phenomenon.

Educational Assessment: Assessing Student Learning in Classroom

This course is designed to further develop the conceptual and technical skills required by teachers to help them identify their educational goals and implement meaningful instructional strategies for effective learning by students with special needs. The focus of the course is on assessment for instructional programming and will outline procedures for designing or selecting, administering, and interpreting, a variety of informal assessment measures typically used in schools.

English Language Learner: Language Acquisition

This course discusses developmental theories and how they apply to English language learners. The focus of this course is on the process of second language acquisition and the role of the classroom teacher. Included in this course is information about the legal obligations of schools and teachers to provide services and about the types of programs schools might provide. Included is information on communicating with parents/guardians.

English Language Learner: Methods & Materials

This course discusses how to apply instructional methods in creating lessons; how to create a motivating and caring learning environment; how to integrate teaching reading, writing, speaking, and listening skills; how to differentiate instruction for English language learners; and how to identify culturally appropriate curriculum and instructional resources.

Exploring the Body

This workshop is recommended to both sculpting and functional artists who want to develop practical skills in sculpting the human figure. Participants will learn how to animate the figure through sculpting emotive facial expression. Discussions and exercises will cover topics such as idea development, communicating character, practical approaches to sculpting and finishing techniques to enhance meaning through material and aesthetics. Visit Archie Bray Foundation at archiebray.org for complete listing, registration steps, and possible scholarship opportunity.

Football Coaches Clinic

This course will improve the coach’s knowledge of football fundamentals, techniques, and coaching concepts specific to the high school level. Coaches will demonstrate understanding of basic football skills, fundamentals, and techniques on a position specific basis. The coach will also develop organizational skills necessary to teach team concepts, organize practices, and run a football camp.

Harassment, Bullying & Cyber-Intimidation in Schools

This course will discuss definitions and the personal, social, and legal ramifications associated with sexual harassment, bullying, and cyber-intimidation. The course will address what we know about these troubling areas and explore preventative strategies before they...
Inclusion: Working with Students with Special Needs in General Education Classrooms

Inclusion is a current educational reform movement that advocates educating students with disabilities in the general education classroom. Upon completion, the learner will be able to define key concepts and terms, identify and describe federal legislation and court cases, and list and describe the federal definition of students entitled to special services. This course will also discuss the roles and responsibilities of educators in providing special services to students educated in inclusive classrooms.

Learning Disabilities: Practical Information for Classroom Teacher

This course lays the foundation for sensitive, appropriate assessment and evaluation of students. In addition, this course covers program planning and implementation, stresses the importance of a close, positive partnership with parents or alternative caregivers, and explores methods for ensuring that the home-school axis is effective and meaningful. Major trends and unresolved issues in the field of learning disabilities are also discussed.

Making & Seeing w/ Bandana Pottery

Participants will learn about making work from generating ideas to turning them into finished, fired artwork. Learn a variety of throwing, handbuilding and decorating techniques including throwing off the hump, altering and carving from solid clay and exploring the possibilities of slip decorating. Discover how these techniques can inform each other, lead to new ideas and deepen our ability to respond to their materials. Visit Archie Bray Foundation at archiebray.org for complete listing, registration steps, and possible scholarship opportunity.

Management of Aggressive Behavior (MOAB)

In this introductory session, participants will learn strategies for preventing and diffusing aggressive behaviors. MOAB presents principles, techniques, and skills for recognizing, reducing, and managing violent and aggressive behavior. The program also provides humane and compassionate methods of dealing with aggressive people. NOTE: This course is available for OPI Renewal Units only.

Monoprinting: The Duality Book

This workshop explores methods of monoprinting on sculptural clay surfaces, including painting with underglazes on plaster surfaces and transferring these paintings to clay. Students should have a basic level of comfort with clay and a working ability to paint and draw. This workshop is recommended for students seeking to explore the potential of the clay surface as a canvas and who want to develop their painting and drawing skills. Visit Archie Bray Foundation at archiebray.org for complete listing, registration steps, and possible scholarship opportunity.

MCA Multi-Sports Clinic 2020

The MCA Coaches Clinic is one of the last "all-sport clinics" in the country, providing professional development for coaches in 10 MHSA sanctioned sports. Staged at Great Falls High, over 50 outstanding presenters, including state, national and world champions, will be on deck. It is a tremendous opportunity for athletic personnel to come together and gear up for the coming school year. Motivation, AD, sports medicine, and strength and conditioning sessions round out a full 2 1/2 days of education, encouragement, and comraderie.

Men’s Basketball Coaches Clinic

Expand your knowledge of the game of basketball by teaming up with Montana Western’s coaching staff led by head men’s basketball coach, Mike Larsen. The unique and innovative approach to teaching and learning at Montana Western enhances the experience of coaches of all ages; inexperience to seasoned. Learn the fundamentals of the game and help with supervision of basic operation of a summer basketball camp to basketball players grades four through high school. Get involved with the teaching of the camp in a variety of different learning situations, competitions, and contests.

Mental Health First Aid Training for Educators

Just as CPR helps you assist an individival having a heart attack, Mental Health First Aid helps you assist someone experiencing a mental health or substance use-related crisis. In this course, you lean risk factors and warning signs for mental health and addiction concerns, strategies for how to help someone in both crisis and non-crisis situations, and where to turn to for help.

This course offers instruction in teaching reading and writing in various subject matter fields at the secondary level. Skills of vocabulary building, comprehension, and writing, as well as methods for motivating adolescents to read and write are addressed. The course provides information.
on recognizing reading difficulties, assessing textbooks, and the integration of reading strategies within a content area. Strategies taught align with the Praxis Reading Across the Curriculum test guide and the Reading in the Content Area national standards.

Reading Fundamentals #1: An Introduction to Scientifically-based Research

This course will improve your knowledge of science and the scientific process. This is the first course in a three-course series. This course is designed to be an informational course with application to educational settings. The curriculum suggestions and teaching strategies explained here were designed to be used for the teaching and remediation of students in kindergarten through sixth grade. Some alterations may be needed if working with specific populations such as gifted, ESL, or special education.

Reading Fundamentals #2: Laying the Foundation for Effective Reading Instruction

Designed to lay the foundation for effective reading instruction, this course will teach you about the elements of effective instruction and the importance of reading instruction. Teachers benefit, and more importantly, students benefit, both in terms of their behavior and their academic performance. Further, you will learn about the importance of reading instruction and read some sobering statistics on reading performance in this country and what happens when individuals are not proficient in reading.

Reading Fundamentals #3: The Elements of Effective Reading Instruction & Assessment

This course will focus on learning to read, reading to learn, and an introduction to reading assessment. Additionally, the five elements of effective reading instruction will be highlighted, including definitions, implications for instruction, and future directions. These five elements include instruction in: phonemic awareness, phonics, fluency, vocabulary, and text comprehension. The course will explore how reading assessment fits within the Reading First Program. This analysis includes specific recommendations on 29 reading assessments. Finally, the course describes how teachers can conduct pivotal curriculum-based measurement procedures in their classrooms.

Response to Intervention: Practical Information for the Classroom Teacher

RTI, or Response to Intervention, is a process schools can and should use to help students who are struggling with academics or behavior. Even though RTI is primarily linked to special education and the early identification of learning problems, RTI is not just for students in special education. RTI is for all students and is based on the premise that a student might be struggling due to instruction or the curriculum in the past, or in the current classroom. Every teacher will have students who are struggling and whether it’s short term or long term, RTI is a valuable tool.

Six Traits of Writing Model: Teaching & Asssessing

This course will discuss why writing is important and why teachers should include writing as often as possible in all content areas. The course will include practical applications for assessing and teaching writing and teaching students how to self-assess their own writing. This course will provide an introduction to the Six Traits of Writing Model, the elements that support the model, and explore practical ways to use this model in your classroom.

Southwest Montana Summer Ed Institute 2020

Join us for three days of hands-on, next-day-implementation classroom strategies! The Ed Institute, which returns to the beautiful Montana Western campus for its 10th year, continues to be a very popular option for teachers to earn college credit or renewal units during the less hectic summer months. With multiple credit options and a wide array of breakout sessions to choose from, the Ed Institute is both affordable and applicable.

Talented & Gifted: Working with High Achievers

This course provides information on the history of exceptional students in relation to education, current law, and accepted methods for referral, assessment, and identification. It covers major program models and methods of differentiating instruction to meet the rate and level of learning of those students identified. The course gives the learner an understanding of ways to meet the affective needs of the gifted and talented student in the regular classroom and lists resources for teachers and parents who would like more information about the talented and gifted.

Teaching Diversity: Influences & Issues in the Classroom

This course will help teachers understand and identify differences in approaches to learning and performance, including different learning styles and ways in which students demonstrate learning. An emphasis in this course will be on understanding how students’ learning is influenced by individual experiences, talents, disabilities, gender, language, culture, family and community values. Participants will be challenged to apply knowledge of the richness of contributions from our diverse society to your teaching field.

Teaching Elementary Math Conceptually: A New Paradigm

This course is designed to expand your methodology for teaching Mathematics. The course will explore an innovative teaching model that incorporates strategies for teaching concepts constructively and contextually. The goal is for you to gain a deeper understanding of the underlying concepts of various math topics and to explore the principles of teaching those concepts to learners. This course will focus on the topics of number sense, basic operations, and fractions.

Teaching Secondary Math Conceptually: Meeting Mathematics Standards

This course will explore an instructional methodology that incorporates strategies for teaching concepts, constructively, and contextually. The goal is for you to gain a deeper understanding of the underlying concepts of various math topics and explore the principles of teaching those concepts to learners. The course will also explore teaching methodologies that support many federal and state standards.

VESi Virtual Education Software

Montana Western is a partner with Virtual Education Software, inc. (VESi). These interactive courses provide expert instruction at a pace that fits your schedule.

SUMMER VESi REGISTRATION DEADLINE: JULY 1

Visit www.virtualeduc.com/umw for course information.

To register call Montana Western School of Outreach at 406.683.7537.

VESi courses in this publication are indicated by this symbol.
Violence in Schools: Understanding Aggression:

This course will improve the coach's knowledge of volleyball fundamentals, techniques, organizational skills, and coaching strategies for individual positional training as well as team offensive and defensive strategies appropriate at the junior high and high school level. The coach will also develop organizational skills necessary to teach team concepts, organize practices, and run a volleyball camp.

Try DI!: Planning & Preparing a Differentiated Instruction Program

Try DI is designed to provide you an opportunity to learn about an instructional framework, Differentiated Instruction (DI), aimed at creating supportive learning environments for diverse learning populations. Students will be presented a method for self-assessment of the extent to which their current instructional approach reflects the perspective, principles, and practices of the DI approach. The concept of a “theory of action” will also be provided within a DI context. Strategies included in this course have been selected on the basis that they are effective in the widest possible range of educational K-12 settings.

Women’s Basketball Coaches Clinic

Montana Western plays host to coaches both seasoned and new to the game during the annual basketball camp. Expand your knowledge of the game of basketball by teaming up with Montana Western’s coaching staff led by head coach, Lindsay Woolley, NAIA Coach of the Year (2019 & 2020). Apply new strategies to basketball players grades four through high school. Learn the fundamentals of the game and help with supervision of basic operation of a summer basketball camp. Get involved with the teaching of the camp in a variety of different learning situations, competitions, and contests.

Understanding & Implementing Common Core Standards

This course has been divided into four chapters. The organization of the course covers the rationale for and design of the Common Core State Standards, the “Common Core Mindset” practitioners need for successful implementation, and what specific actions can be taken for deeper implementation across settings.

Understanding Soda Firing

Participants will have the opportunity to make work; discuss how their design choices will be affected by the kiln; learn about clays, slips and glazes typically used in soda firing: dig and incorporate local materials into their work; and help load and fire a cross-draft and a downdraft soda kiln to cone 10 reduction atmosphere. Students should have basic throwing and/or handbuilding skills are recommended. Visit Archie Bray Foundation at archiebray.org for complete listing, registration steps, and possible scholarship opportunity.

Violence in Schools: Identification, Prevention & Intervention Strategies

This course provides an overview of violence and the motivational purposes behind aggression. The correlation and impact of the media, community, and family upon violence is investigated. The learner will gain an understanding of identification and intervention approaches to working with out-of-control behaviors. In addition, information about the national resources available for both parents and teachers is covered. Upon successful completion of this course, participants will have a better understanding of violence and the motivations behind its use, as well as specific strategies to minimize the occurrence of violence in the school and community.

Volleyball Coaches Clinic

This course includes topics on violence, aggression in the classroom, youth gangs, aggression in sports and on television, how drugs and alcohol play a role in aggression and violence, and “hot spots” that tend to breed aggression and violence. It is designed to help school personnel become more aware of the causes of aggression and ways to evaluate it and intervene before it turns to violence in the schools.

The Vessel: Taking a Line for a Walk

Participants will explore the idea of line in pottery. Discussions will explore how profile, proportion, rhythm, decoration and edge all address line in different ways. These elements will be explored through demonstrations, exercises and critical examination to help participants to see form more clearly and pursue their ideas more confidently. Basic throwing and/or handbuilding skills are recommended. Visit Archie Bray Foundation at archiebray.org for complete listing, registration steps, and possible scholarship opportunity.

Why DI?: An Introduction to Differentiated Instruction

In this course you will learn what is meant by Differentiated Instruction (DI) and the common myths associated with creating the differentiated classroom. We will discuss the legal, theoretical, and pedagogical foundations in the field of education that support the utilization of DI practices and principles. We will reflect on best practices and national trends in the design of the educational setting to meet the needs of a diverse learning population. This course also provides connections to a variety of concepts, variables, and resources that will assist practitioners in aligning their own professional practices with those found in the differentiated classroom.

Yellowstone STEAM Teacher Workshop

With Yellowstone National Park as the venue, learn how to use both traditional and innovative methods to incorporate Art into STEM lessons (STEAM). Explore new ideas and strategies while networking with other educators on best practices for cross-curricular design. NOTE: Two sessions offered during summer 2020 semester. Contact Yellowstone Forever at 406.848.2400 or Yellowstone.org to register.
This online course offers insights into infectious diseases that are essential for medical professionals. By the end of this course, you’ll have a solid understanding of the most common infectious diseases as well as a grasp of the procedures that can help contain them.

**Certified Outpatient Coder**
Medical coding for outpatient facilities is an important skillset to help outpatient hospitals/facilities receive appropriate reimbursement and maintain compliance with coding guidelines and government/payer regulations. You will also receive access to the AAPC Advanced ICD-10-CM Online Code Set Training which will take your ICD-10-CM coding skills to a higher level. Upon completion of this course you will be prepared for the AAPC Certified Outpatient Coder (COC) exam. The voucher is prepaid access to AAPC for the AAPC Certified Outpatient Coder (COC) exam. Certified Outpatient Coder includes detailed instructions for using the coding manuals, understanding the coding guidelines, and accurately applying the ICD-10 coding steps. In addition, you will find information on the impact of the coding changes on medical coders, healthcare staff, physicians, software systems, documentation, and information technology.

**Management of Aggressive Behavior (MOAB)**
In this four-hour introductory session, participants will learn strategies for preventing and diffusing aggressive behaviors. MOAB presents principles, techniques, and skills for recognizing, reducing, and managing violent and aggressive behavior. The program also provides humane and compassionate methods of dealing with aggressive people.

**ICD-10 Medical Coding**
ICD-10 is an upgraded diagnostic and procedural medical coding system that, by law, must be implemented throughout the healthcare industry. This new coding system is radically different from the version currently in use, so it’s important to start preparing for and implementing the massive changes to the existing coding system. This online course offers you comprehensive, robust training in diagnostic and procedural coding, using the ICD-10-CM (diagnostic) and ICD-10-PCS (procedural) coding manuals. This training includes detailed instructions for using the coding manuals, understanding the coding guidelines, and accurately applying the ICD-10 coding steps. In addition, you will find information on the impact of the coding changes on medical coders, healthcare staff, physicians, software systems, documentation, and information technology.

**Medical Math**
Brush up your basic math skills by reviewing fractions, decimals, and percentages. Then you will dive into measurement systems and conversions used in the medical field. You will do dosage calculations for oral, parenteral, and intravenous medications. You will explore three different methods you can use for dosage calculations. You will also learn an easy formula that you can apply to many dosage calculations. Then you will get an introduction to basic statistics and probability. You will find out how to interpret the latest medical findings for your patients.

**Spanish for Medical Professionals**
A beginner Spanish course for medical professionals.

---

### Certificate in Infectious Diseases and Infection Control

This online course offers insights into infectious diseases that are essential for medical professionals. By the end of this course, you’ll have a solid understanding of the most common infectious diseases as well as a grasp of the procedures that can help contain them.

**Certified Outpatient Coder (voucher included)**
Medical coding for outpatient facilities is an important skillset to help outpatient hospitals/facilities receive appropriate reimbursement and maintain compliance with coding guidelines and government/payer regulations. You will also receive access to the AAPC Advanced ICD-10-CM Online Code Set Training which will take your ICD-10-CM coding skills to a higher level. Upon completion of this course you will be prepared for the AAPC Certified Outpatient Coder (COC) exam. The voucher is prepaid access to AAPC for the AAPC Certified Outpatient Coder (COC) exam.

**Dental Office Manager**
This nationally recognized Administrative Dental Assistant Online Certificate Program will teach you the essential skills for managing the business aspects of a dental practice and becoming an administrative dental assistant as well as learn the how to manage a dentist’s office. You will learn about dental terminology and anatomy, medical records management, accounts receivable and reimbursement management, insurance and patient billing, patient scheduling, procedural and diagnostic coding, and other office responsibilities including arranging staff scheduling and staff meetings. The Administrative Dental Assistant Online Program will prepare you for a new career working in a dental office.

**ICD-10 Medical Coding**
ICD-10 is an upgraded diagnostic and procedural medical coding system that, by law, must be implemented throughout the healthcare industry. This new coding system is radically different from the version currently in use, so it’s important to start preparing for and implementing the massive changes to the existing coding system. This online course offers you comprehensive, robust training in diagnostic and procedural coding, using the ICD-10-CM (diagnostic) and ICD-10-PCS (procedural) coding manuals. This training includes detailed instructions for using the coding manuals, understanding the coding guidelines, and accurately applying the ICD-10 coding steps. In addition, you will find information on the impact of the coding changes on medical coders, healthcare staff, physicians, software systems, documentation, and information technology.

**Management of Aggressive Behavior (MOAB)**
In this four-hour introductory session, participants will learn strategies for preventing and diffusing aggressive behaviors. MOAB presents principles, techniques, and skills for recognizing, reducing, and managing violent and aggressive behavior. The program also provides humane and compassionate methods of dealing with aggressive people.

**Medical Math**
Brush up your basic math skills by reviewing fractions, decimals, and percentages. Then you will dive into measurement systems and conversions used in the medical field. You will do dosage calculations for oral, parenteral, and intravenous medications. You will explore three different methods you can use for dosage calculations. You will also learn an easy formula that you can apply to many dosage calculations. Then you will get an introduction to basic statistics and probability. You will find out how to interpret the latest medical findings for your patients.

**Spanish for Medical Professionals**
A beginner Spanish course for medical professionals.

skills, this is the course for you. By the time you finish these lessons, you will have a solid grounding in basic medical math.

**Medical Office Basics Suite**

Four major areas essential to the healthcare industry are covered in this collection of classes: Medical Terminology, Spanish for Medical Professionals, HIPAA Compliance, and Medical Math. This bundle of medical office focused courses prepares the novice for entry-level work or enhances one who is already employed in a healthcare system. Learn more about each area of content at ed2go.com/umwestern. Suite bundles are not eligible for partial drops or refunds. Transfers to other open sessions of the same course are available.

**Mental Health First Aid**

This course is appropriate for anyone who wants to learn about mental illnesses and addictions, including risk factors and warning signs. This training teaches participants a 5-step action plan to help a person in a mental health or substance use crisis or challenge connect with professional, peer, social and self-help care. Using scenarios, activities and role-playing, participants are given the opportunity to practice their new skills and gain confidence-making it easier to apply these skills in a real-life situation.

**Spanish for Medical Professionals**

With increasing numbers of Spanish-speaking patients entering the healthcare system every year, it’s more crucial than ever for health professionals to learn medical Spanish. What’s more, adding Spanish skills to your resume can broaden your career horizons and give you an advantage over other healthcare workers. This course skips the “touristy” topics and focuses on the basic medical Spanish phrases you really need to know in a medical setting. Whether you’re new to the language or just want a refresher, this medical Spanish class can help you. ¡Vamos! (Let’s go!)

**Of Horse, Human & Nature**

*Coming September 2020!*

Knowledge inspires action and all roads lead to Dillon, Montana, September 10-12, 2020, for the first-ever conference merging traditional, natural horsemanship with 21st century new equine and horse-human research, education, and horse experiences. This conference brings together leading voices and experts in equine, animal behavior, natural horsemanship, ranching, outfitting, wilderness and backcountry use, equine and human initiatives that advance wellbeing, horse-and-rider demonstrations, hands-on experiences with horses, and compelling storytellers, award-winning equine films and filmmakers as well as the latest research and science of the horse-human relationship. For more details and to register visit: www.montanacenterforhorsemanship.org/events/conference-horse-human-nature

**Accounts Payable Specialist Certification**

This online course will prepare you for the Institute of Finance & Management’s (IOFM) Accounts Payable Specialist (APS) certification. This associate-level certification focuses on intermediate financial operations skills. Today’s companies employ certified accounts payable professionals to ensure their expenses are accurately paid. With APS certification, you demonstrate your understanding of invoices, payments, T&E, Automation, and other key functions to potential employers. If you’re new to the AP industry or plan to advance your career, the Accounts Payable Specialist course is for you. Exam cost included in program cost.

**Boiler Operators’ Workshop**

Gain fundamental knowledge of low or high pressure steam systems. Prepare for the Montana State Boiler’s License exam. At the conclusion of the course, participants will receive a certificate of completion. Instruction prepares students to take the Montana Department of Labor and Industry’s exam. Textbooks are required at an additional cost.

**Diesel Mechanics w Certification *Coming September 2020!**

The Diesel Mechanic program is designed to prepare students to function as entry-level diesel mechanics performing tasks related to modern diesel engines and commercial vehicles as well as to maintain and repair diesel engines. Certification: Students who complete this comprehensive course are not only prepared for entry-level positions as technicians in diesel engine repair shops and related facilities, they will be eligible to sit for the Automotive Service Excellence (ASE) Automotive Maintenance and Light Repair (G1) certification exam. Certification will issue once candidates complete and submit the 1-year work experience requirement.

**Home Inspection Certificate**

This course covers the principal components, procedures, and processes of home inspection. This course has also been approved by the American Society of Home Inspectors (ASHI) and various home inspector organizations and regulatory boards for membership renewal credits or continuing education credits. It is also...
one component of the steps required to obtain a NIBI Certified Inspector credential. Through 11 in-depth modules, you will gain insight on the methodologies required to perform a home inspection. You will learn how to inspect and report on heating and cooling systems, plumbing and electrical systems, roof and siding, the foundation, and other major components of a home.

**Introduction to Google Analytics**

Learn to use Google Analytics to make the most of your online traffic. This course guides you step-by-step, report-by-report, through the major parts of the Google Analytics interface including how to track visits, determine your best content, understand demographics, recognize patterns of use, and more.

**Introduction to Quickbooks Online**

This course will teach you how to manage your business financially with QuickBooks Online. This powerful accounting software has helped millions of small business owners oversee their finances. And with the cloud-based program outpacing the desktop version, there’s no better time to refresh your QuickBooks knowledge. You will learn to use key features and gain hands-on experience creating invoices, receipts, and statements; track payables, inventory, and receivables; generating reports, and more. Whether you’re new to QuickBooks or need a quick refresher, this course will empower you to take control of your business’s financial accounting, all with the ease and convenience of an online platform.

**Legal Secretary**

In this course, you will learn the fundamental skills needed to start an entry-level position as a legal secretary. You will learn basic legal terminology, office procedure and management, basic accounting, and QuickBooks. Along the way, you will discover what it’s like to work in this fascinating and fast-paced field.

**Management of Aggressive Behaviors: MOAB**

In this four-hour introductory session, participants will learn strategies for preventing and diffusing aggressive behaviors. MOAB presents principles, techniques, and skills for recognizing, reducing, and managing violent and aggressive behavior. The program also provides humane and compassionate methods of dealing with aggressive people.

**Marketing Your Business on the Internet**

In this hands-on course, you’ll discover proven methods for establishing an Internet presence and building a brand identity. You’ll learn to incorporate SEO, advertising, email, social media, and more to develop an effective Internet marketing plan for your business even with little money to spend.

**Welding w Certification**

*Coming September 2020!*

The Welding program is designed to prepare students to function as welders. The work of welders includes joining pipe sections for oil and natural gas pipelines, working in numerous industrial environments, building ships, and supporting construction. Students can serve in positions such as Welders, Cutters, Solderers, and Brazers. The purpose of this program is to prepare students to support industrial, transportation, oil and gas, construction, and many other industries with welding skills. Certification: In addition to facilitating entry-level welding positions, all candidates will be certified by the American Welding Society (AWS) that they successfully completed the AWS Schools Excelling through National Skill Standards Education (SENSE) Entry Welder Program in the Shielded Metal Arc Welding Process.

REO offers agricultural workers & their families assistance with:

- Funding for short-term classes or college tuition, books and other related costs.
- Job search, placements and advancements.
- Employment security and wage increases.

**Opening doors to jobs, training and your future.**

It’s YOUR future! For more information, please visit reomontana.org or call/email your local REO office: 406-461-0504 or lacey@reomontana.org.

Adobe Value Suite
Are you interested in dabbling in digital design and photo editing? This group of courses teaches you the basics of Adobe’s powerful image and graphic design software. You’ll explore three Adobe products: InDesign CS6, Illustrator CS6, and Photoshop CS6. Learn each of these programs to design and express yourself whether it is for personal reasons or for business purposes.

Beginner’s Guide to Getting Published
Get your writing directly into the hands of an editor and on the shelves of your favorite stores. This course, taught by a successful journalist and author, will help you understand every step of the publishing process and how to give yourself the credibility publishers notice.

Instant Italian
Learn to express yourself comfortably in Italian. You’ll be surprised how quickly and easily you are able to learn Italian in this course, which provides knowledge of practical, everyday words and phrases you are likely to hear if you vacation in Italy.

Keys to Effective Communication
This course will teach you the very basics of how to get control of your finances rather than letting them control you. It is the help you need before learning about investing, debt elimination, retirement or college planning. There aren’t many places that you can go to learn these principles, so take advantage of this opportunity to learn online.

Management of Aggressive Behavior (MOAB)
In this four-hour introductory session, participants will learn strategies for preventing and diffusing aggressive behaviors. MOAB presents principles, techniques, and skills for recognizing, reducing, and managing violent and aggressive behavior. The program also provides humane and compassionate methods of dealing with aggressive people.

THE TRAGEDY OF CYMBELINE.

SHAKESPEARE IN THE PARKS 2020
MONTANA WESTERN LEGACY PLAZA – JULY 27, 6 PM
Mental Health First Aid Training

Just as CPR helps you assist an individual having a heart attack, Mental Health First Aid helps you assist someone experiencing a mental health or substance use-related crisis. In this course, you learn risk factors and warning signs for mental health and addiction concerns, strategies for how to help someone in both crisis and non-crisis situations, and where to turn to for help.

Microsoft Office 2016 Value Suite

Learn to use the basic features of Microsoft Word 2016, Microsoft Excel 2016, and Microsoft PowerPoint 2016, three of the most fundamental software programs used in educational and professional settings. Each course within the Value Suite will introduce you to the features and functionality of Microsoft’s latest software.

Photographing Nature with Your Digital Camera

Discover how your nature photos can become works of art rather than just snapshots. This course will help you explore composition and lighting as you master your digital camera’s controls and features to take exceptional nature photos in no time.

Shakespeare in the Parks: Cymbeline

Since 1973, Shakespeare in the Parks has brought free, professional productions of Shakespeare and other classics to mostly rural and underserved communities. All performances are offered at no cost in local parks and public spaces, making them accessible to all. This year’s production is “Cymbeline” and will be performed on the Legacy Plaza located on the campus of the University of Montana Western.

**HIGH SCHOOL PARTNERSHIPS**

Montana Western partners with Montana high schools to provide dual credit courses specifically taught by an approved, qualified high school instructor and taught in the high school schedule. UMW’s partner high schools are Beaverhead County High School, Butte High School, CMR High School, Frenchtown High School, Great Falls High School, Jefferson High School, Missoula Sentinel High School, and Powell County High School.

**ARTH 160: Global Visual Culture**

Students explore visual arts, music, drama/theatre, and dance with some attention to literature and applied arts. Students read, view, listen, and participate in the arts, learning fundamental vocabulary and concepts, and discussing such questions as: what are the arts; how are the arts created; how and what do arts communicate; and how do the arts reflect society? The depth and quality of their arts observations and reflection, both written and oral, are assessed.

**ARTZ 106: Visual Language-2D Foundations**

This studio course introduces the formal elements and principles of design, color theory, and spatial control using traditional and digital media with an emphasis on problem-solving.

Students will explore career options related to the visual arts. This course also examines art as an expression of culture and historical context and includes writing exercises in aesthetics and art criticism.

**CAPP 131: Basic Microsoft Office**

In this hands-on course, students will develop a working knowledge of word processing, spreadsheets, presentations, and database management software applications in relation to business. During the course, students will complete computer concept and information literacy assignments. Students will also take the Information & Technology Literacy exam which is required for graduation. The course will be evaluated by hands on assignments and examinations.

**EDEC 247: Child & Adolescent Growth & Development**

Students will examine, analyze, and apply research, theories, and issues concerning basic biosocial, cognitive, and psychosocial developmental stages from conception through childhood and adolescence. For integrated lab students use a variety of instruments to observe and interact with individual children as a way of integrating theory and practice. Students will need access to an approved early childhood program to complete the required 45 lab hours.

**EDU 222: Educational Psychology & Child Development**

Candidates will explore, compare, contrast, and analyze major psychological theories of development and learning. Teacher candidates will apply these theories to teaching practices.

16.
major progression of physical, social, emotional, moral, and cognitive development and the ranges of individual variation within these domains of development in children from birth to adolescence will be emphasized. The course will emphasize the diversity of all learners with regard to learning styles, multiple intelligences, gender differences, cultural expectations, and exceptionality, as well as teaching approaches to accommodate these differences as well as normal psychological development.

GEO 115: Essentials of Geology
This course provides an introduction to geologic processes and Earth history. Students will learn about the interrelationships between biological systems, atmospheric processes, oceanic processes, crustal processes, and deep-Earth processes, and apply their understanding to Earth history and the impacts that their existence has on the natural environment. The course is taught in an online format, and is not intended for students majoring in Environmental Science or Environmental Interpretations.

GPHY 141: Geography of World Regions
An overall view of how the lands and peoples of the world are organized into coherent geographical regions, how landscapes differ from region to region, and how the people differ in terms of their beliefs, ways of life, economic livelihood, and discussion of important topical areas in each region.

HTH 110: Personal Health & Wellness
The purpose of this course is to increase students’ understanding of the foundations of personal health and wellness. Students will be provided with information and experiences designed to enhance knowledge of current topics in personal, social, and global health, including issues relating to the use of drugs and alcohol. Students will be evaluated during group experiences, projects, examinations, and written assignments.

PSYX 100: Introduction to Psychology
A survey of the history, methodology, and major theories of psychology. Topics include the influence of biology, individual experience, and culture on human consciousness. Students are expected to demonstrate understanding and comprehension of course content through course examinations and out-of-class writing assignments.

THTR 101: Introduction to Theatre
The basics of drama—including formal theatre, improvisational drama, and narrative film and television—are story, place, audience, and actor. Students actively explore the relationships between these elements in a lab setting, by creating scenes based on selections from literature, current and historical events, cuttings from film scripts, and more. They analyze the purposes of drama, and learn about a variety of “Western” as well as non-European traditions. They study the responsibilities of the actor, script writer, director, and design staff in theatre and film productions.

What is dual enrollment?

Montana students take college courses while still in high school
Courses may be offered at your high school, local college or online
Tuition and fees are free* for the first two dual enrollment courses
Students in need can apply for fee waivers for additional courses

*Course fees and textbook costs may apply for some courses. For more information, please visit mus.edu/DualEnroll/.
Safe @ Home
Safe@Home by Safe Sitter® is a program designed for students in grades 4-6 to prepare them to be safe when they are home alone. The program is designed to enable any adult that enjoys teaching preteens to facilitate an introductory level program to prepare students to care for themselves when parents are away for short periods of time. Safe@Home is a 90-minute program that teaches students how to practice safe habits, how to prevent unsafe situations, and what to do when faced with dangers such as power failures or weather emergencies. Students are also introduced to the Safe Sitter® First Aid Chart and learn a system to help them assess and respond to injuries and illnesses. Go to SafeSitter.org to learn more or to register.

Safe Sitter Essentials
Safe Sitter® is designed to prepare students in grades 6-8 to be safe when they’re home alone, watching younger siblings, or babysitting. The Instructor-led class is filled with fun games and role-playing exercises. Students learn how to prevent unsafe situations and what to do when faced with dangers such as power failures or weather emergencies. Students learn tips to manage behavior that will help them stay in control of themselves and the children in their care. Students also learn the ages and stages of child development, as well as practice diapering. Learning skills such as choking rescue and CPR is often students’ favorite part of the class. Students also learn a system to help them assess and respond to injuries and illnesses. The ability to screen jobs, discuss fees, and greet employers will set students up for success now and in the future. Students practice these skills through various role plays.

SAT/ACT Prep Course
This course will provide grammar and usage review specifically geared to the rules that you’ll be tested on in the ACT/SAT. Learn how to maximize your time on reading comprehension passages and the passages in the science test. In addition to preparing for specific question types on both exams, this course will give you pointers in time management, anxiety relief, scoring, and general standardized test-taking. Weekly assignments encourage you to work with fellow classmates and the instructor to maximize your performance on all aspects of the verbal questions of the ACT and SAT.

Safe Sitter Essentials
Safe Sitter® Essentials is a one day class designed to prepare Girl Scout Cadettes to be safe when home alone, watching younger siblings or babysitting.
Completing a Safe Sitter® class will help Cadettes check off some of the requirements for the Babysitter Badge and First Aid Badge and earn a Safe Sitter® Patch.

CALL SCHOOL OF OUTREACH TO SCHEDULE YOUR CLASS!

Hiking in the Beartooth Mountains of Wyoming

Beartooth, Shoshone, Absaroka. When it comes to the mountains of Wyoming, even the names are poetic. Hike off the beaten path through undulating hills and alpine meadows as you explore the natural wonders of these remote and glorious mountains. Join seasoned naturalists to learn about the geological forces that gave rise to dramatic cliffs, lush valleys and windswept plateaus. Encounter exquisite lakes and babbling creeks in this rich riparian habitat, and discover the abundance of life that survives at this altitude, including the mighty grizzly bear.

Hike, Raft and Ride: The Wyoming Wilderness with Your Grandchild

See if you and your grandchild have what it takes to become a true mountain man or woman while hiking, rafting and horseback riding your way through the wilderness of Wyoming. You won’t even need your phone while staying at our authentic lodge just outside of Yellowstone National Park. Instead, find your calling as wilderness warriors by learning key survival tips in an exciting team challenge. Then, become one with the great outdoors as you paddle your raft on white-water rapids and gallop through Northern Yellowstone National Park on horseback with our experts. Alongside your grandchild, you’ll have a great time as you both yippee-ki-yay along with live Western entertainment, and learn about amazing wildlife in the great mountains of Wyoming.

Yellowstone: A Great Outdoor Adventure With Your Family

Tie up your hiking boots, hop on horseback and climb into a whitewater raft to explore America’s first national park on foot, horse and water. With your family by your side, take part in hands-on explorations of Yellowstone National Park in streamside habitats and forested mountains. Find out how the plants, animals, bugs, fish, water and weather patterns all work together to create this fascinating ecosystem. Plus, visit Old Faithful — the world’s most famous geyser — to investigate hissing fumaroles, steaming geysers, sulfurous mudpots and bubbling hot springs.

Wildlife & Geysers: Yellowstone With Your Younger Grandchild

Explore the wild wonders of Yellowstone National Park with your grandchild. Investigate bubbling mud pots, hissing steam vents, spouting geysers, thundering waterfalls, animal diets and more during hands-on activities. Get a close-up look at the park’s carnivores at the Grizzly & Wolf Discovery Center, discover how to recognize rarely seen animals using silhouettes and tracks. Spend the week learning from an expert naturalist and park rangers as you work towards your very own Junior Ranger badge!

KEEP EDUCATING YOURSELF

SUMMER INSTITUTE | DILLON, MT
JUNE 9-11, 2020

Join us for three days of hands-on, next-day implementation classroom strategies. The Southwest Montana Ed Institute, which returns to the beautiful Montana Western campus for its 10th year, continues to be a popular option for teachers to earn college credit or renewal units during the less hectic summer months. With multiple credit options and breakout sessions to choose from, the Summer Ed Institute is both affordable and applicable.

WHAT ATTENDEES SAY:
“Very inspiring! I really needed to get back in touch with my love of the profession and how important this work we do is!”

“Thank you! I now have a more positive outlook on the standards and how to use them.”
